

INTEROP[®]

TOKYO | 8 - 12 JUNE, 2015

Event Report

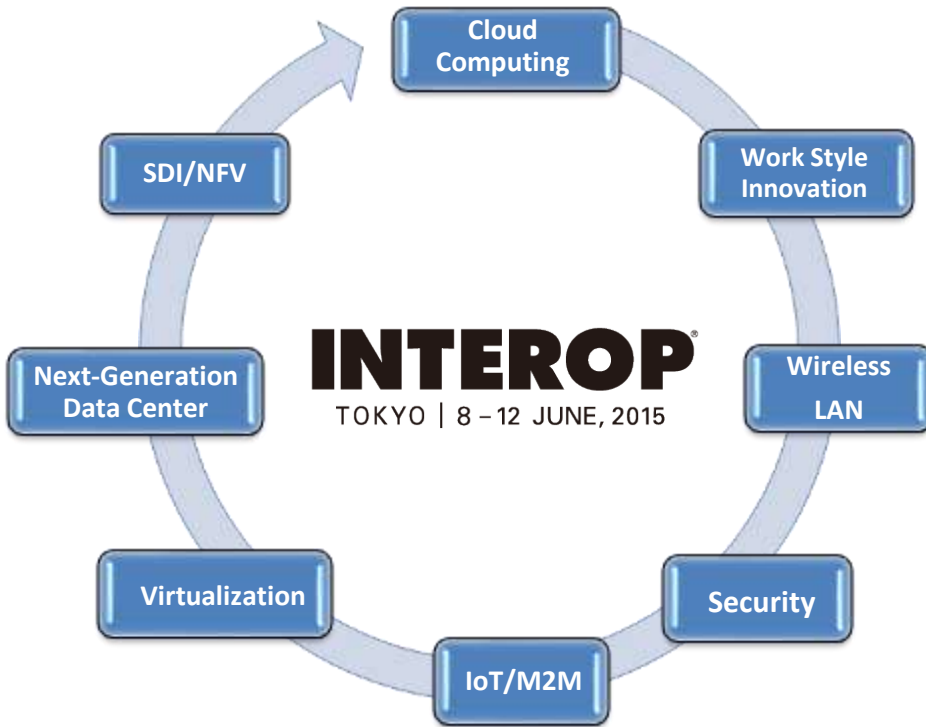

The 22th edition of Interop Tokyo has finished with great success with showing and sharing the leading edge technologies through in-depth educational programs, a solution-rich exhibit floor, and by showcasing live technology demonstration from leading vendors.

Index:

- Outline (P1)
- Event profile (P2)
- Themes & Theme Sponsors (P3)
- Number of Visitors & Exhibitors(P4)
- Exhibitor List (P4~)
- Visitor's demography (P11~)
- Keynote(P12~)
- ShowNet (P17~)
- Best of Show Award (P19~)
- IoT World(P31)
- KOREA Pavilion(P32)
- Academic Innovation(P32)
- SDI ShowCase(P33)
- Interop Pavilion / Seminar(P34)
- Interop summit(P34)

“ShowNet” has always been a comprehensive internet technology demonstration of Interop Tokyo since the beginning of the show back in 1994. As many of Interop fan knows the naming “Interop” originates from[InterOperability] and this is indeed what ShowNet is composed of . You will see various and wide range of interacted equipment and services selected and gathered from Interop Tokyo’s exhibitors . Giving a special prominence to its contents, ShowNet presents a brand-new theme of the hottest issues every year.

“Can we continue internet service with the current network design and/or operating method?”

Since last year, we started proposing the new way of network design, operation method. As the second challenge , we set the concept as "Scratch & Re-build the Internet Phase 2 - ULTIMATE BALANCE - " and demonstrate the different style of net challenge work from last year. We will try deploying the network by balancing simplicity, flexibility and robustness.

Stop by the ShowNet booth on the hall 4 and check out our network!!

ShowNet External and Peers

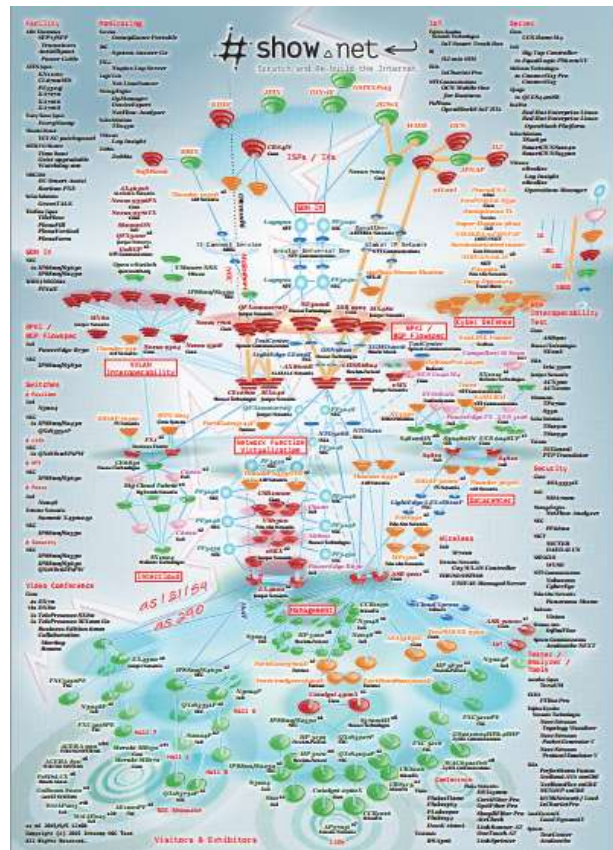

ShowNet Technical video

Please look at the technical video which the details about ShowNet.

◆ IoT World

Experiece the Connected World spread by IoT

Interop Tokyo had proposed the next Connected World since late 90` s by demonstrating what can be possible and what will be the challenges when more things are connected with the internet.And now, network environment, technology, cost, etc., the environment surrounding us through this 10 years have progressed greatly. Smart things are connected to clouds with broadband wireless network and big data is analyzed and deliver more value to stakeholders.The new business movement is growing with this new ecosystem on the other hand, there are new challenges to deliver the new connected economy such as technology standards, interoperability, security and new business model.Considering the business innovation with no idea until now, by the harmony of the technology to achieve it, it is considered whether going to break the future of IoT industry. We had showcased the "IoT World "at the seminar and exhibition format. A lot of people visited the "IoT World".

SDI
Software Defined Infrastructure
ShowCase
The next technology and solution for constructing cloud

In 2014, we showed to visitors "SDI(Software Defined Infrastructure)" as a key theme to contain the control, management technology of the network by the software including "OpenFlow" which had been caught as "SDN" and the cloud connection techniques such as orchestrator or the cloud OS at Interop Tokyo.

And this year, we continued focusing on SDI as a key theme and there are more than 40 companies introducing "UseCase" & "Solution" to visitors through the more than 50 live demonstrations, the pavilion booths and the open Stage in Interop Tokyo 2015.

◆ Interop Pavilion / Seminar

Company explanation with a concentration theme this year was carried out in the Interop pavilion. The newest product information that is useful for a visitor's business solution was given.

◆ Interop Summit

Interop summit was held on June 10 of the event first day. Many key person participated as a place of information exchange for market revitalization of Japan.
